Message from the Chair

Congratulations to the faculty, administrators, and students of our Ontario Internationally Educated Physical Therapists Bridging (OIEPB) Program! After reviewing its successes thus far, the Ministry of Citizenship and Immigration has awarded the OIEPB Program another three years of funding.

This month’s edition of PT Link highlights the contributions of our faculty in 2013. With so many hard-working and dedicated faculty, it is always a difficult choice when selecting the recipients of our Exceptional Achievement and Recognition Awards. Thank you to our Awards Committee for organizing a wonderful event and to the broader community who came out to show their support for our award winners.

Katherine Berg,
Chair, Department of Physical Therapy
The Department of Physical Therapy hosted their annual Exceptional Achievement and Recognition Awards Ceremony on February 20th, 2014.

These awards provide an opportunity to acknowledge those who have made outstanding contributions to the Department of Physical Therapy curriculum. This year, we were pleased to recognize over 80 individuals and teams for their outstanding contributions.

**Department of Physical Therapy Exceptional Achievement Awards**

The Exceptional Achievement Awards recognize individuals who have made exceptional contributions to the profession of Physical Therapy in one of four major areas: Practitioner, Education, Research and Professional Development. We are pleased to recognize the following 2013 Exceptional Achievement Award recipients for their longstanding and exceptional contributions to the field:

**Kinny Quan Velanoski - Education**

Kinny is a graduate of the University of Toronto. She is currently an Advanced Practice Clinician in Orthopaedics at St. Joseph’s Health Centre. Kinny has demonstrated longstanding contributions to the education of physical therapy students. She has been involved as clinical instructor, clinical lab assistant, facilitator to both PT Logic and Clinical Reasoning, and guest lecturer within the Department of Physical Therapy curriculum. Kinny works tirelessly to engage in meaningful student learning, motivating students to become evidence-based scholarly practitioners and encouraging inquiry while providing ongoing constructive feedback. Congratulations to Kinny on her achievement!

**Jennifer Agnew – Practitioner**

Jennifer has been a Physical Therapist at the Hospital for Sick Children in Respiratory Medicine since 1989. She has pioneered physical therapy care in the Cystic Fibrosis Clinic over the years and is recognized nationally and internationally for her extensive clinical knowledge and contributions to the field. Jennifer was the recipient of the Award of Distinction from the Ontario College of Physiotherapists in 2010 and can now add the Exceptional Achievement Award as Practitioner to her repertoire!
Jeffrey Andrion – Professional Development

Jeffrey is a physiotherapist at the Sunnybrook Holland Centre and is the co-chair of the Philippine Working Group of the International Centre for Disability and Rehabilitation (ICDR). Since 2006, he has been mentoring internationally educated physiotherapists and is a facilitator and adviser of the Society of Physiotherapists with Foreign Credentials. He completed his equivalency studies in Physical Therapy at McGill University and his MA in Critical Disability Studies at York University where he is currently completing his PhD in Health. Jeffery is an Instructor in the Department of PT and faculty member of the Ontario Internationally Educated Physiotherapists Bridging (OIEPB) Program. Congratulations to Jeffrey on his award!

Nancy Salbach – Research

Nancy is a physical therapist and a CIHR New Investigator in Knowledge Translation. Dr. Salbach is an Associate Professor in the Department of Physical Therapy at the University of Toronto and an Adjunct Scientist at the Toronto Rehabilitation Institute-University Health Network and St. John’s Rehab-Sunnybrook Health Sciences Centre. Dr. Salbach’s research program has a clinical stream and a knowledge translation stream. The clinical stream involves the development of effective assessment tools and interventions for improving walking competency after stroke. The knowledge translation stream relates to advancing understanding of how to translate quality based procedures in stroke and HIV rehabilitation into clinical practice.

Congratulations to all the 2013 Exceptional Achievement Award recipients!
Department of Physical Therapy Recognition Awards

The Department of Physical Therapy Recognition Awards acknowledges individuals or teams who have provided an extraordinary educational experience and positively impacted physical therapy students in the academic or clinical environment. This year we are pleased to acknowledge over 81 individuals and 14 teams with Recognition Awards.

Faculty and Staff
(Inter-departmental)
Alison Bonnyman

Honors and Awards

Congratulations to our Faculty!

Appointments:

Susan Jaglal has been appointed to the Academic Board at the University of Toronto as Acclaimed Teaching Staff. The Academic Board addresses matters that affect teaching, learning, and research.

Grants:

O’Brien KK, Colquhoun H, Levac D, Straus S, and Baxter L. have received a Planning Grant from the Canadian Institutes of Health Research for their project, *Establishing Methodological Quality Criteria for Scoping Studies: Advancing the Field of Knowledge Synthesis within the Context of Chronic Disease, Aging and Rehabilitation*.

Advocacy:

On Wednesday January 15, 2014, Sharon Gabison, a member of the Ontario Autism Coalition, was invited to participate in pre-budget consultations with the Ontario Minister of Finance, Charles Sousa. Her presentation focused on the need for increased funding in Ontario for Adults with Autism. Recommendations included increased individualized funding, increased resources for day programs and increased crisis support. The investment in resources would save billions of dollars to taxpayers in the long run by reducing the costs for residential placements.
Save the Dates for Spring Reunion 2014!

The PT and OT Alumni will be holding two events:

1. **Pub Night at O’Grady’s**
   Friday **May 30th** from 7:00 pm to 10:00 pm. More information to follow. All PT and OT grads are welcome! Gather your friends and join in!

2. **Breakfast, Meeting, and Tour of the Rehab Building:**
   PT and OT grads of all years are welcome! Breakfast begins at 9:00 on Saturday, **May 31st** at 500 University Avenue. The event will conclude by noon.

   Stay tuned for further details next month.

---

**The Prevention, Assessment and Treatment of Chronic Wounds**

**May 3 & 4, 2014**

Instructors: **Ethne L. Nussbaum**, PhD, MEd, BScPT; **Pamela E. Houghton**, PhD, HBSc, BScPT.

Location: Rehabilitation Sciences Building, University of Toronto, 500 University Avenue, Toronto

Cost: $ 250

This **Canadian Physical Therapy Wound Care Collaborative** two-day course provides a unique opportunity for physical therapists to gain knowledge and practical skills in the principles of wound prevention, assessment and management. The focus will be on the most common types of chronic wounds: arterial and venous ulcers of the lower extremity, and pressure ulcers. Biophysical foundations of failed healing and evidence to support use of electrical stimulation, ultrasound and ultraviolet light to promote wound resolution will be presented.

Techniques will be practiced using realistic tissue models of different types of wounds. The overall objective is to improve patient outcomes by enabling participants to join interprofessional wound care teams and to incorporate wound care into a variety of practice settings.

For information and registration: Canadian Physical Therapy Wound Care Collaborative.

*e.nussbaum@utoronto.ca*

Support personnel are eligible to take this course.
International Forum on HIV and Rehabilitation Research -
Launch of the Knowledge Translation and Exchange Library

The first *International Forum on HIV and Rehabilitation Research* was held in Toronto, Canada on June 13-14th, 2013. This event was a collaboration between the Canadian Working Group on HIV and Rehabilitation (CWGHR), the Canada-UK HIV and the Rehabilitation Research Collaborative (CUHRRC). This forum aimed to translate research evidence knowledge on HIV and rehabilitation internationally, and to identify new and emerging research priorities in HIV and rehabilitation.

Over 100 participants, including people living with HIV, researchers, clinicians, representatives from AIDS Service and Community-based Service Organizations, educators and policy makers from Canada, Ireland, USA and the UK attended the event providing opportunities for new collaborations and partnerships in HIV, rehabilitation, disability and research.

The CUHRRC and CWGHR are pleased to launch the Knowledge Transfer and Exchange (KTE) Library for further dissemination of research knowledge on HIV, disability, and rehabilitation translated at the Forum [http://hivandrehab.ca/EN/AGM2013/index.php](http://hivandrehab.ca/EN/AGM2013/index.php)

The KTE Library includes:

- **Video recordings** of presentations from the Plenary and Research Evidence Panel Sessions
- **Power Point Slides and Rapporteur notes** for each of the speaker sessions
- **Final Forum Report: Advancing Research and Practice in HIV and Rehabilitation**
- **Detailed Forum Workbook with Rapporteur Notes**

For more information on the International Forum on HIV and Rehabilitation Research, please contact Kelly O’Brien ([kelly.obrien@utoronto.ca](mailto:kelly.obrien@utoronto.ca)) or Francisco Ibanez-Carrasco ([fibanezcarrasco@ohtn.on.ca](mailto:fibanezcarrasco@ohtn.on.ca)).

**Acknowledgements:** The *International Forum on HIV and Rehabilitation Research* was supported by a Dissemination Grant from the Canadian Institutes of Health Research (CIHR), HIV/AIDS Research Initiative, the Public Health Agency of Canada, the Ontario HIV Treatment Network, and the University of Toronto. The video recordings were provided in kind by Three Flying Piglets. The views expressed herein do not necessarily represent the views of the Public Health Agency of Canada.
Update from the PT Student Council

The first years are back at 500 fresh off their first placement experience, where they had a great chance to show the physiotherapy community all their hard work since September. The second years are eagerly awaiting their chance at writing the PNE in May and June.

The annual Blue Mountain ski trip was a great weekend of skiing and program bonding between the first and second years. In intramurals, rehab (PT and OT) continue to be a powerhouse, capturing the Division 1 Coed volleyball championship.

Student council is hard at work planning the graduation formal in June, eagerly awaited by the class of 2014!

The Council

Private Practice Curriculum Renewal and Business Theme Discussion Forum

On behalf of Sharon Switzer-McIntyre, Jackie Schleifer Taylor, Euson Yeung and Sharon Gabison, I would like to thank everyone who participated in the Private Practice Curriculum Renewal and Business Theme Discussion Forum that took place in early February 2014.

The discussion and information gathered through the forum event provided a good platform for enabling some renewed thinking about the content and delivery within several aspects of the MSc. PT curriculum, including the transition of the Business and Practice Management curriculum from a theme to a course, private sector involvement in clinical education and 1 day per week clinical teaching model, and content and teaching methodologies specific to electrotherapy.

A summary report to all participants will follow in March 2014.

I would also like to thank Linda Stone from the Department of Physical Therapy for her invaluable counsel in making this event happen.

Sincerely,

Allan Macdonald
Member of the Business and Practice Management Advisory Group

A CALL FOR RESEARCH PROJECTS!

Department of Physical Therapy, University of Toronto
MScPT Research and Program Evaluation for Physical Therapy Practice

Deadline for Submission – Tuesday May 20th, 2014

The Department of Physical Therapy is preparing for the 2014/2015 Research Component of the MScPT Program and invites physical therapists with a Professional or Research Masters or PhD to submit a project outline and participate as research advisors to one of 18 student groups. Each group will be comprised of approximately 5 students. Research advisors will be paired with an established researcher (PhD) from the Graduate Department of Rehabilitation Sciences, referred to as the faculty advisor, who has experience with graduate student supervision.

The content of the research component of the MScPT program, entitled “Research and Program Evaluation for Physical Therapy Practice”, is amortized over three Units (Units 6, 10 and 12). In Unit 6 (September 22, 2014 – October 10, 2014), the student groups will develop the research protocol and submit the protocol for Ethics approval. The role of the research advisor is to facilitate this process with the support of the faculty advisor and a teaching assistant. Due to the short duration of Unit 6, advisors are expected to meet weekly with students and review the final ethics protocol with a quick turnaround time of 1-2 days. To enable effective communication, we recommend a maximum of three advisors (not including the faculty advisor).

Students will work on their projects throughout Units 8A (January 5, 2015 – April 3, 2015) and 8B (May 18, 2015 – June 12, 2015) having Mondays as protected research time. Throughout this period, advisors maintain contact with students through email, phone and meetings as the project requires. In Unit 10/12 (June 15, 2015 – July 24, 2015), the groups will analyse their data and complete a draft of a manuscript for publication and a poster. Advisors facilitate data analysis and review drafts (no more than 2 drafts) of the manuscript and the poster. Faculty advisors provide guidance and support in the analysis and write-up phase. Formal presentations and submission of the final manuscript occur at the end of Unit 10/12.

New in 2014! We ask that research and faculty advisors meet with student groups once in September 2014 prior to the start of Unit 6 to review study objectives and provide guidance on background literature for students to review in preparation for Unit 6.

Continued on page 13...
Potential projects for the MScPT Research Component must be relevant to physical therapy and can include:

- Chart Reviews **requires review of a sample of 10 charts to ensure that the data you wish to collect are routinely recorded in the charts and of adequate quality for chart abstraction.
- Surveys
- Program Evaluation
- Pilot Studies (Quantitative or Qualitative)
- Qualitative Studies (example: focus groups or in-depth interviews)
- Secondary Data Analysis

**No Literature or Systematic Reviews**

**University of Toronto T-Space Initiative**

T-Space (https://tspace.library.utoronto.ca) is University of Toronto (U of T) open access web space devoted to showcasing and preserving scholarly work accomplished at U of T. The Department of Physical Therapy posts the scholarly products of each MScPT research project, including abstracts, conference citations and published articles, on T-Space. This effort is to raise the profile of the research accomplishments made possible through successful collaboration among faculty, students, and the clinical community.

**Online Project Submission**

To submit a project:

1. Click on the following link: [http://app1.rehab.utoronto.ca/ptresearchproject](http://app1.rehab.utoronto.ca/ptresearchproject). If the website does not open automatically, then cut and paste the URL into your Internet browser.
2. Create an account to obtain a username and password. If you created an account last year, your same username and password will still apply.
3. Once you logon, click “Submit a new project” and complete the online form. We recommend that you circulate a draft of your project description in Word with co-advisors and when ready to submit, cut and paste into the online form. You may save your project on the online form and revise at any time using the “Save” button. When you are ready to submit the final version, click “Submit”.
4. Links to examples of a qualitative and quantitative project outline are included on the website to provide a guide to the level of detail to include in the outlines.
5. **New in 2014!** We’ve included a checklist for advisors to ensure their project outline meets the requirements for the MScPT curriculum. Click on the link in the online form to access the checklist.
We are receiving an increasing number of project outlines each year. Selection will be based on the:

- quality of the project description,
- relevance of the project to physical therapy, and
- feasibility of the project in relation to the timelines of the MScPT research curriculum and the research capacity of the students.

The deadline for submission of projects is **Tuesday May 20, 2014**. Please contact Nancy Salbach at 416-946-8558 or nancy.salbach@utoronto.ca or Kelly O’Brien at 416-978-0565 or kelly.obrien@utoronto.ca if you have questions.
The NEAL program is now accepting applications for the 2014-2015 cohort to begin in September 2014.

Academic leaders are often promoted into roles based on their academic expertise with little, if any, leadership development. NEAL is specifically designed to fill that gap. The goal of the NEAL program is to foster a productive, visionary and collaborative academic leader in the Academic Health Science System. Participants will become members of a community of leaders who have the mindsets and capabilities to successfully run their division, research, education or other academic unit and help their faculty be successful.

For more information, visit:
http://www.cfd.med.utoronto.ca/programs/leadership.html

Deadlines:
Early Bird Application Deadline is April 22, 2014 and the Final Deadline is June 2, 2014.

The ACPAC program is a hybrid program with a mixture of material including five intensive one-week sessions held on-site (Components II and IV) and off-site (Component I and III) delivered in episodic format across a 10 month period between September and June of each year.

All practitioners are to attend the on-site (in Toronto) components which will occur across 5 weeks.

For more information: http://chronicdiseases.ca/arthritis/

Continuing Professional Development, Faculty of Medicine, University of Toronto
Orthopaedic Division of CPA - Lecture and Annual General Meeting

Pre AGM Lecture:

David Lindsay BHMS, BPhyt, MSc
Head Physical Therapist at the University of Calgary Sport Medicine Centre

“New Advances in Hip Rehabilitation”

Saturday June 7, 2014
Lecture 9am—12pm
AGM 12pm – 1pm

Hotel Novotel Toronto North York
3 Park Home Avenue North York Toronto (416) 733-2929

Cost: $35 for PTs - $25 for PT students

Lunch will be provided and door prizes will be awarded at the end of the AGM. Registration is on a first come first serve basis and will be limited to Orthopaedic Division members until May 1, 2014. After this date, registration will be open to all physiotherapists. Spot is not guaranteed until BOTH registration form and payment are received.

For more information contact: orthodivAGM@yahoo.com.

Call for Posters

Submissions are invited for poster presentations by March 31, 2014.

For more information please visit: http://www.grsnc.umontreal.ca/36s/
The conference this year will be held at the Delta Meadowvale Hotel in Mississauga from March 28-30, 2014. This is a great opportunity to meet and get to know your colleagues. Building a network/community of PTs is important - your peers can help you solve problems, meet new clients and provide mentorship.

The conference is a great place to get to know some of the profession's leading suppliers. Attending the trade show not only supports the OPA, but increases your network of trusted, reliable companies that can help you source all of the products/services for your practice.

A special feature at this year's conference is the keynote address by Dr. Mike Evans to kick off the weekend.

For more information, please visit: http://www.opa.on.ca/conference_2014.shtml

Conferences

The 4th Health & Wellbeing in Children, Youth, and Adults with Developmental Disabilities Conference

*Life Transitions*

Pre-Conference: Wednesday, October 22, 2014
Main Conference: Thursday, October 23 - Friday, October 24, 2014
Abstract and Poster Submission Deadline: Friday, March 28, 2014
Visit: http://interprofessional.ubc.ca/HealthandWellbeing2014/ for more information
Cardiorespiratory and Mobility Skills Course

Location: Toronto General Hospital

Date: May 3-4, 2014

Cost: $350 Early bird until March 14; $400 after March 14

Course Objectives:
The 2-day course is designed for graduate physical therapists & students who wish to establish & improve physiotherapy skills using evidence based practice approach with Cardiorespiratory patients.

The program will review assessment techniques for the acute Cardiorespiratory patient through didactic and small group sessions. Some topics include radiology, oxygen therapy and delegation, ventilators, lines and tubes, clinical decision making and interpretation of lab values for physiotherapists. Chest Physiotherapy techniques, suctioning and Safe Mobility for the Critical Care Patient will be reviewed in both lecture and lab format.

Please contact us for the full brochure: Catharine Duncan email catharine.duncan@uhn.ca or call 416-340-4800 x4432

About PT Link

PT Link is published bi-monthly. The next issue will appear in January.

To subscribe please email pt.chair@utoronto.ca and type “Subscribe” in the subject line.

To unsubscribe please email pt.chair@utoronto.ca and type “Remove” in the subject line.

Past issues of the U of T PT Link will be posted on the Department of Physical Therapy website.

Please submit content in Word format to Linda Stone at pt.chair@utoronto.ca.
